GIZ-PROJECT: GUADALAJARA, 10/2019 - 03/2020

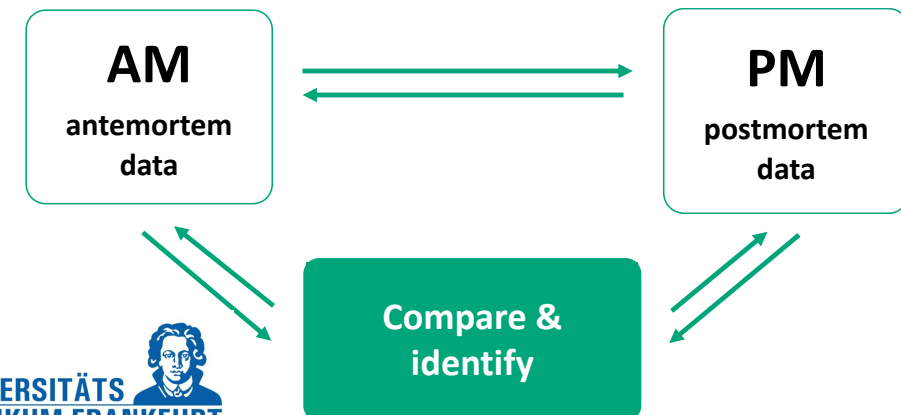

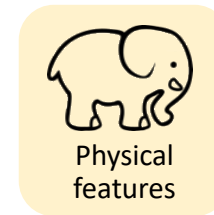

TIME IN GUADALAJARA 2019/2020

LESSONS LEARNED 2019/2020

Challenges

- Shortage of specialized staff
- Identification focused on DNA
- AM & PM Data
 - Complicated
 - Not standardized
 - Lack of data exchange

PROJECT PLAN

Challenges

- Shortage of specialized staff
- Identification focused on DNA
- AM & PM Data
 - Complicated
 - Not standardized
 - Lack of data exchange

Ideas

- Train more forensic experts
- Find supportive alternatives
- Work on data management
 - Pragmatic approach
 - Harmonization
 - Use local possibilities

MEXICAN PROJECT PARTNERS

UDG

**Instituto Jalisciense
de Ciencias Forenses**
SCIENTIA LUX IUSTITIAE

IJCF

UABJO

TRAINING & RESEARCH

- Conception and realization of curriculum „Medical Specialism in Forensic Medicine“
- Promote research and establish an ongoing exchange of knowledge & experiences
- Project with Hospital civil (GDL): clinical documentation of tattoos as ID-support?

TRAINING & DATA MANAGEMENT

- Establish practice orientated research activities and promote the cooperation with UdG
- Expand the formation and training of specialized staff (together with UdG)
- Further development and expansion of existing local database (AM & PM)

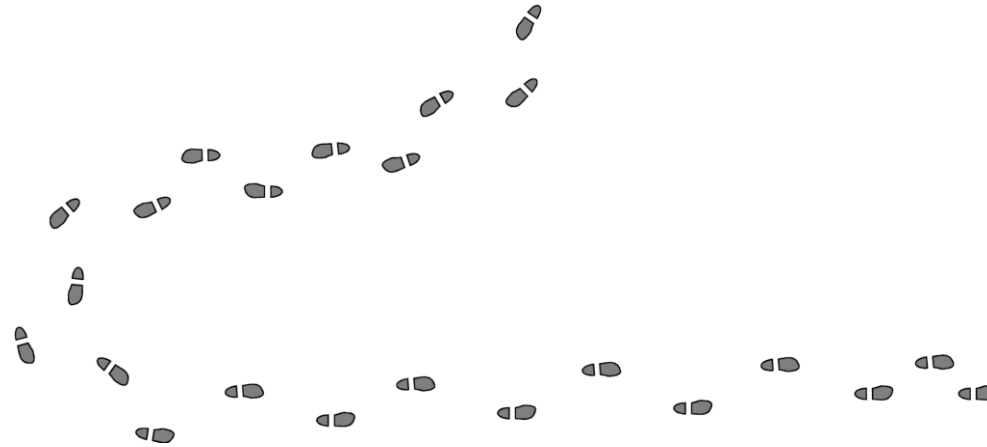

TRAINING & DATA MANAGEMENT

- Build up a structured training for specialized staff
- Research project to find out more about local particularities and ‘useful identifiers’
- Analyze and evolve the local data-acquisition and data-management
